With singular entree to the MGM library, including vaulted screen tests and rehearsal footage, the film is wrapped in Judy's voice, actually telling her story in her own words. So many outsiders have tried to tell this story and so many friends and family have weighed in - now Judy gets center stage, all to herself. This is her ultimate comeback.

Stories, interviews, blogs and photo features are continually added to and updated online, with the production teams inviting interaction and input from online readers and users who are on the lookout for the latest information on a given subject. Each week's online story development culminates in the weekly broadcast, curated from the week's reporting by the various beat teams. Fox, DIFFERENT IS THE NEW NORMAL reveals an acutely personal first-hand account of Tourette's through Ariel's eyes. As rising health care costs threaten to bankrupt the country, MONEY AND MEDICINE tackles the medical, ethical and financial challenges of containing runaway health care spending. In addition to illuminating the so-called waste and overtreatment that pervade our medical system, this documentary explores promising ways to reduce health care expenditures while improving the overall quality of medical care. It captures the painful end-of-life treatment choices made by patients and their families, ranging from very aggressive interventions in the ICU to palliative care at home. The film also investigates the controversy surrounding diagnostic testing and screening as well as the shocking treatment variations among patients receiving a variety of elective procedures. *Airdate: Tuesday 9/25 @ 9:00 pm on KCTS 9 & KYVE*

*Pleasure and Pain* (Documentary, 1 hour)

With his customary wit, wisdom and willingness to get involved, Michael Mosley gets to grips with the fascinating worlds of pleasure and pain. Teasing out the precise neural circuitry that allows us to experience pleasure, Michael discovers how pleasure is at the root of our ability to make sense of the world, and how it reinforces healthy behaviours such as eating, having sex and keeping warm. Michael talks to new parents high on the pleasure hormone oxytocin; challenges his fear of heights with the thrill-seekers who jump 220 metres off a dam for fun; and meets a woman who turned her own wedding into a science experiment to try to find out how much pleasure she was feeling. He also investigates the inextricable link between pleasure and pain, eating a year's worth of chocolate to investigate the precise moment when pleasure turns to pain and finding out what effect a reward has on our ability to tolerate pain. *Airdate: Sunday 7/11 @ 10:00pm on KCTS 9 & KYVE*

*Rare* (Documentary, 1 hour)

RARE, a new feature documentary follows an inspiring and extraordinary mother in a race against time as she unites a group of isolated people from around the world in a quest to cure her daughter's rare genetic disease. Together, they discover that community, laughter and hope are some of the greatest therapies. When Donna Appell learned that her baby daughter Ashley suffered from a rare genetic disorder that would kill her in thirty years, she was told there were less than thirty people in the US who had been diagnosed with it and no one knew where to find them. Realizing that no one was going to help cure "just one child," Donna set about forming an advocacy group and harnessing the internet to gather as many patients as possible who suffered from Hermansky-Pudlak Syndrome (HPS), which includes albinism, blindness, a bleeding disorder and often a fatal pulmonary fibrosis. Filmed with intimate access over three years, as the clock ticks and the stakes get higher, RARE follows Donna and her advocacy group as they travel to Puerto Rico and throughout the US in a race to fill a drug trial they hope could prolong her daughter's life. Along the way we become part of a sweet love story when Donna's daughter Ashley falls for an earnest young man who has the same fatal disease. *Airdate: Wednesday 8/22 @ 12:00 pm on KCTS 9 & KYVE*
